

ABSTRACT OF THE DISCLOSURE

Product comprising a fibrous support and a hydrophilic
5 and/or permeabilizing coating, preparation process
therefor and use thereof

The invention relates to a product comprising a fibrous
10 support and a hydrophilic coating, the preparation
method thereof and the use of same, such as in or for
disposable absorbent products, e.g. in diapers. More
specifically, the invention relates to a product
15 comprising a fibrous support and a hydrophilic and/or
permeabilizing coating which is linked to at least part
of a surface of the support. The invention is
characterized in that the coating comprises a film that
covers at least part of the support and a hydrophilic
and/or permeabilizing agent.
